AI websites all look the same.

5 Claude skills that fix it, with the exact install commands.

Obsidian

Swipe

Why it happens

The model picks the average.

Without direction, Claude samples from the **high-probability center** of its training data. Anthropic says the result is almost always:

“Inter fonts, purple gradients on white backgrounds, and minimal animations.”

Anthropic, “Improving frontend design through Skills”, 12 Nov 2025

A skill gives Claude a point of view **before** it writes code.

Skill 1 of 5

frontend-design

Official, by Anthropic

Makes Claude choose a palette, type and layout first, then check that plan against **generic AI defaults** and revise it before building.

Use it for

Every project. Install this one first.

Install in Claude Code

```
/plugin install frontend-design@claude-plugins-official
```

Source: github.com/anthropics/claude-plugins-official

Skill 2 of 5

Impeccable

Open source, by Paul Bakaus

One skill, **24 commands**: audit, critique, polish, bolder, quieter. Plus **59 detector rules** that catch AI-generated design tells, with no API key.

Use it for

The last pass before a client sees it.

Install, then run inside Claude Code

```
npx impeccable install
/impeccable init
```

Source: github.com/pbakaus/impeccable

Skill 3 of 5

UI/UX Pro Max

Open source, by Next Level Builder

Builds a design system from your brief: style, colours, font pairing and page pattern. **79 searchable UI styles**, **192 reasoning rules**.

Use it for

Starting a new site from a blank page.

Install in Claude Code

```
/plugin marketplace add nextlevelbuilder/ui-ux-pro-max-skill
/plugin install ui-ux-pro-max@ui-ux-pro-max-skill
```

Source: github.com/nextlevelbuilder/ui-ux-pro-max-skill

Skill 4 of 5

GSAP skills

Official, by GreenSock

Teaches Claude correct GSAP: timelines, **ScrollTrigger pin and scrub**, React cleanup and performance. Every GSAP plugin is now free.

Use it for

Scroll-scrub and scroll-story websites.

Install (works with Claude Code)

```
npx skills add https://github.com/greensock/gsap-skills
```

Source: github.com/greensock/gsap-skills

Skill 5 of 5

webapp-testing

Official, by Anthropic

Claude opens your site in a real browser with Playwright, **takes screenshots** and reads the console logs. No more designing blind.

Use it for

Checking the build on phone and desktop.

Install in Claude Code (Anthropic's example pack)

```
/plugin marketplace add anthropics/skills
/plugin install example-skills@anthropic-agent-skills
```

Source: github.com/anthropics/skills

Before you install anything

Read a skill first.

A skill is instructions plus scripts that run with **your permissions**. Open SKILL.md and skim the scripts before you install.

All five are public repos, updated in 2026.

Save this for your next build.
